

DigiAds User Guide.

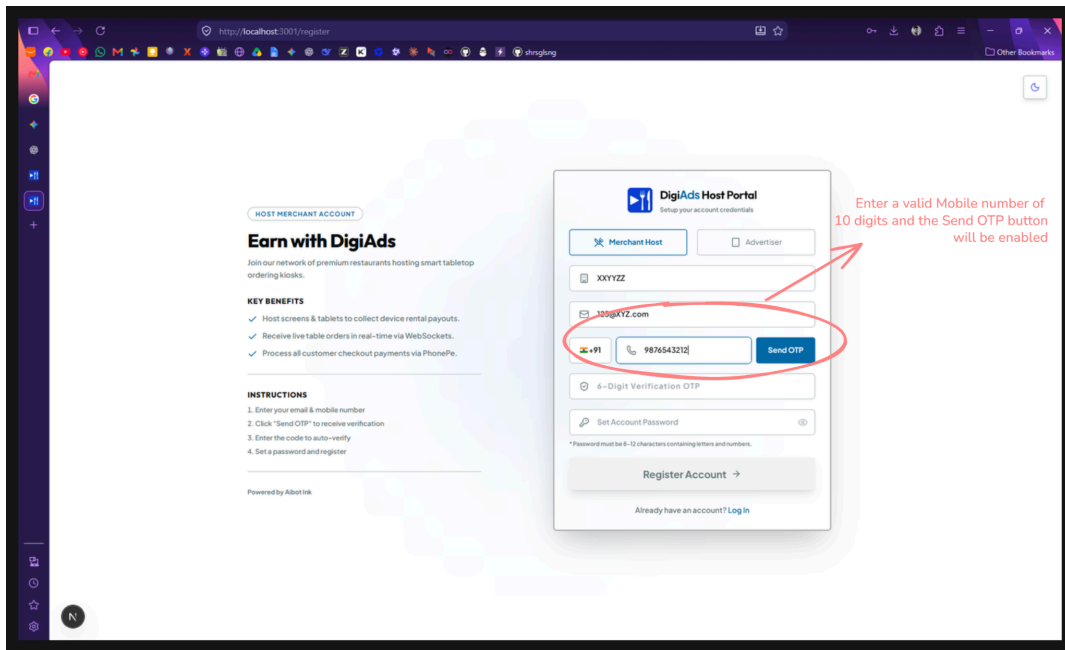

1. Navigate to DigiAds.space (not case-sensitive).
2. Browse the page and select your desired feature *advertiser or *venue host .

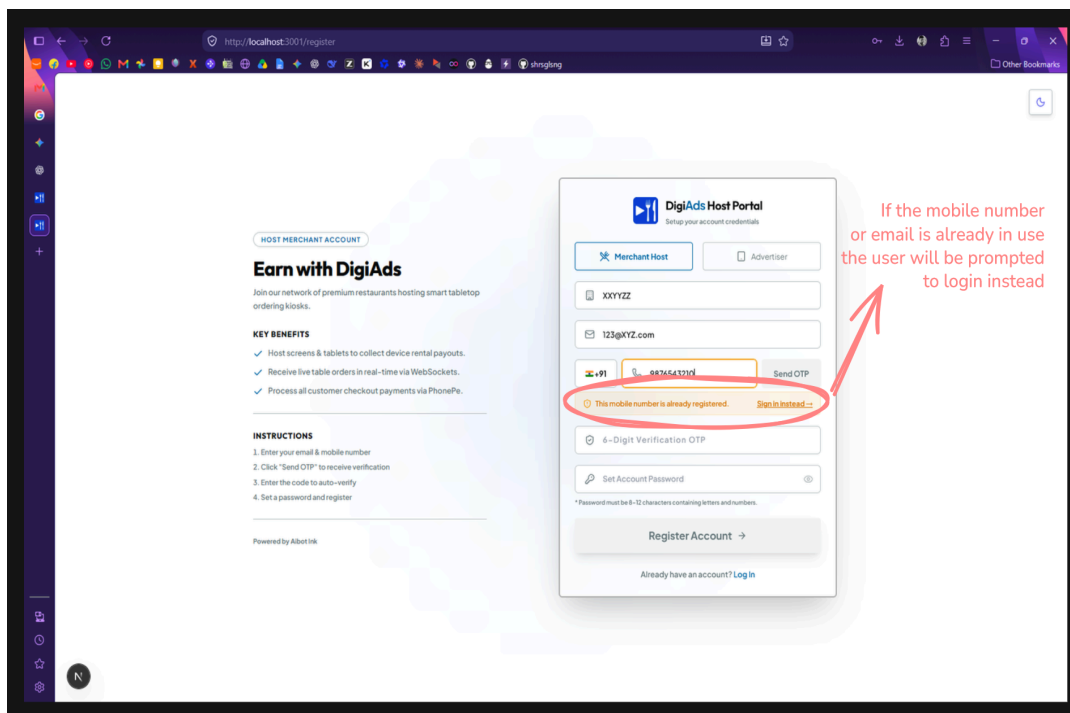

3. Users will be asked to register if they are not already a user of our platform.

4. Choose your Preferred Role and proceed with the registration process.
5. Enter your name, email ID, and mobile number.
6. After entering your mobile number, the OTP button becomes available.

7. After Entering OTP users will be asked for a password which must contain a combination of numbers and letters min 8 characters and max 12 characters.
8. If the users use a already registered mobile number they will be asked to login instead.

9. OTPs are rate limited so make sure you enter the correct mobile number.

The screenshot shows the 'DigiAds Host Portal' registration interface. On the left, there's a section titled 'EARN WITH DIGIADS' with 'KEY BENEFITS' and 'INSTRUCTIONS'. The 'INSTRUCTIONS' list four steps: 1. Enter your email & mobile number, 2. Click 'Send OTP' to receive verification, 3. Enter the code to auto-verify, and 4. Set a password and register. The main form on the right has fields for 'Merchant Host' (with a dropdown showing 'XYZYZ'), 'Advertiser' (with a dropdown showing '123@XYZ.com'), a country selector (set to '+91'), and a phone number field (containing '9876543212'). A 'Resend in 32s' button is next to the phone number. Below the phone number, the OTP '123456' is displayed with a green checkmark and the text 'OTP code successfully verified'. A password field is shown with a strength indicator and a note: 'Password must be 8-12 characters containing letters and numbers'. A 'Register account' button is at the bottom of the form. Red annotations include: an arrow pointing to the 'Resend in 32s' button with the text 'after entering OTP and password users can register their accounts'; an arrow pointing to the phone number field with the text 'OTP's are rate limited so check your mobile number carefully'; and an arrow pointing to the password field with the text 'Read the Password instructions carefully Password must contain a combination of letters and number symbols are also allowed length must be more than 8 character and less than equal to 12 characters'.

10. Once registration is complete users can login to their account.
