

DigiAds Venue Guide

1. After logging in Users will be asked to Submit a device Request form.

The screenshot displays the 'Merchant Portal' interface for 'Host Applications'. The 'Device Application Form' is the central focus, with several red arrows pointing to specific fields and buttons, each accompanied by a red text annotation. The annotations include: 'Enter venue name this name will be shown in tabletop so use proper character casing for better presentation in the tablet' pointing to the 'Outlet Name' field; 'Name of the person to contact when in need of services etc' pointing to the 'Contact Person Name' field; 'Brief description about your venue' pointing to the 'Outlet Description' text area; 'Address of the venue' pointing to the 'Street / Location' field; and 'Enter Pin code and city and state will be automatically fetched' pointing to the 'ZIP Code' field. Additionally, a red arrow points to the 'Detect GPS' button, which is circled in red. The form also includes a map section labeled 'Storefront GPS & Map Placement' showing a map of Bengaluru.

2. Enter venue name carefully this name with (letter case) will showup in the tabletops and bills so use camel case for better readability
3. Enter the rest of the details and select venue location via GPS

This screenshot is identical to the one above, showing the 'Device Application Form' in the 'Merchant Portal'. It includes the same red annotations for the 'Outlet Name', 'Contact Person Name', 'Outlet Description', 'Street / Location', and 'ZIP Code' fields. The key difference is the addition of a red circle around the 'Detect GPS' button, with a red arrow pointing to it from the annotation 'detect location automatically via GPS'.
